DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 24-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 24 and 26-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Shaheen et al. (US Patent 6,374,109).

Regarding claims 24 and 26, Shaheen et al. disclose a wireless system,
comprising:

a mobile switching center that is adapted to be coupled to the public switched
telephone network (see col.5 lines 1-5);

a plurality of base stations (fig.1b), communicatively coupled to the mobile
switching center, that are adapted to communicate with wireless terminals using one of
at least two services (see col.7 line 60 through col.8 line 12), and

wherein each base station supports the at least two services within the
geographic area of the base station (see col.3 lines 51-60).

Regarding claim 27, Shaheen et al.. disclose the first frequency band is above 1800 Megahertz and the second frequency band is below 1000 Megahertz (see col.3 lines 44-50).

Allowable Subject Matter

4. Claims 1-23 and 28-32, allowable.
5. Claim 25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claims 1, 7 and 21, none of prior art teaching "a second path, coupled between the first and second ports, the second path including a filter that stops upstream signals in the first frequency band and passes upstream signals in at least a second frequency band and downstream signals in at least third and fourth frequency bands" as cited in the claim.

Regarding independent claims 15 and 28, none of prior art teaching "passing at least one additional frequency band of the received signal without amplification" as cited in the claim.

Regarding independent claim 29, none of prior art teaching "a plurality of amplification circuits coupled to the antenna and coupled in series, each amplification circuit adapted to selectively amplify upstream signals in a selected frequency band for

Art Unit: 2684

a selected service and to pass downstream signals and other upstream signals" as cited in the claim.

Regarding dependent claim 25, none of prior art teaching "received form wireless terminals for one of the service and that passes without amplification signals form other wireless terminals for the other service" as cited in the claim.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Nguyen whose telephone number is (703) 305-3427. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MAUNG NAY A, can be reached at (703) 308-7749.
